Generated Traffic: Implications for Transport Planning Victoria Transport Policy Institute 3 Defining Generated Traffic Generated traffic is the additional peak-period vehicle traffic that results from a road improvement, particularly urban roadway expansions.

### Contact CGS Team
A technique for generating an executable document that includes information for validating generated code is provided. The technique can include mapping an assumption to a portion of generated code, the portion containing functional code that is related to implementing the assumption, the mapping allowing at least the portion to be validated with respect to the assumption.

Question: What is "generated as identity" feature in 12c, and how does "generated as identify" compare to the concept of an Oracle sequence? Answer: In all relational databases, finding a unique key to identify each row has always been problematic.Oracle first introduced "sequences", or linear number generators" wo allow for the specification of unique keys for tables and this has worked just ...
